Hoja de corredera

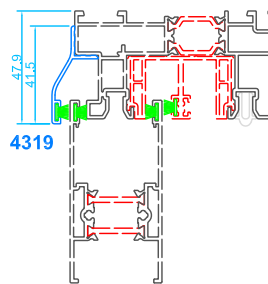

Marco de corredera de triple carril
Hoja de corredera

Marco de corredera con 1 hoja fija

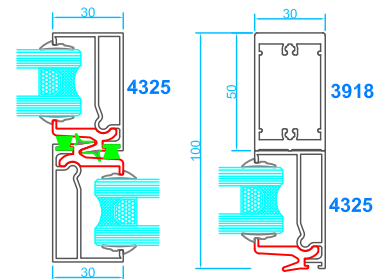

Marco multicarril, posibilidad infinita de hojas

Goterón para evitar filtraciones de agua a ras de fachada

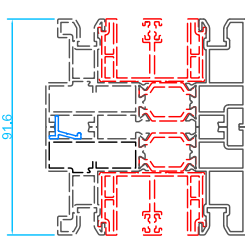

Nudos centrales

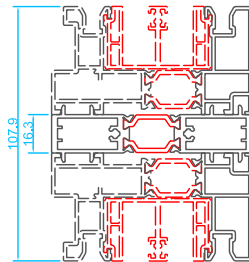

Cruce estándar

Cruce con refuerzo de Inercla

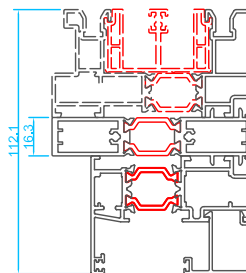

Perfiles de unión

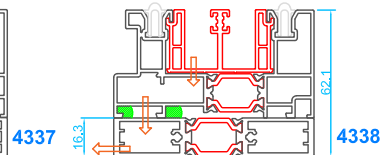

Unión invisible

Unión marco con marco corredera

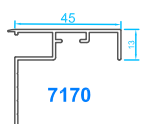

Unión marco corredera con fijo

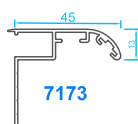

4338

En casos de ventanales situados en zonas muy expuestas a pluviales, existe la posibilidad de instalar el perfil 4338 como suplemento de marco. Este perfil permite obtener una mayor altura de marco inferior. Al realizar el desagüe INDIRECTO a través de este perfil, se consigue una mayor columna de agua, pudiendo desalojar un mayor caudal de agua en condiciones de presión de viento desfavorables.
